Project Concept

1

Player Control

You control a

army

in this

top down

game

where

the mouse

makes the player

move and attack

2

Basic Gameplay

During the game,

the enemy's armies

appear

from

the enemy's base

and the goal of the game is to

destroy every enemy's structure

3

Sound & Effects

There will be sound effects

of armies clashing, jobs being done, and walking

and particle effects

on building and unit deaths

4

Gameplay Mechanics

As the game progresses,

each player gets more money and bigger armies through their strategy

making it

so that the better strategy wins

[optional] There will also be

worker units that will produce money when mining ore

[optional] There will also be

a castle building that produces worker units

[optional] There will also be

soldier units capable of damaging other units and buildings

[optional] There will also be

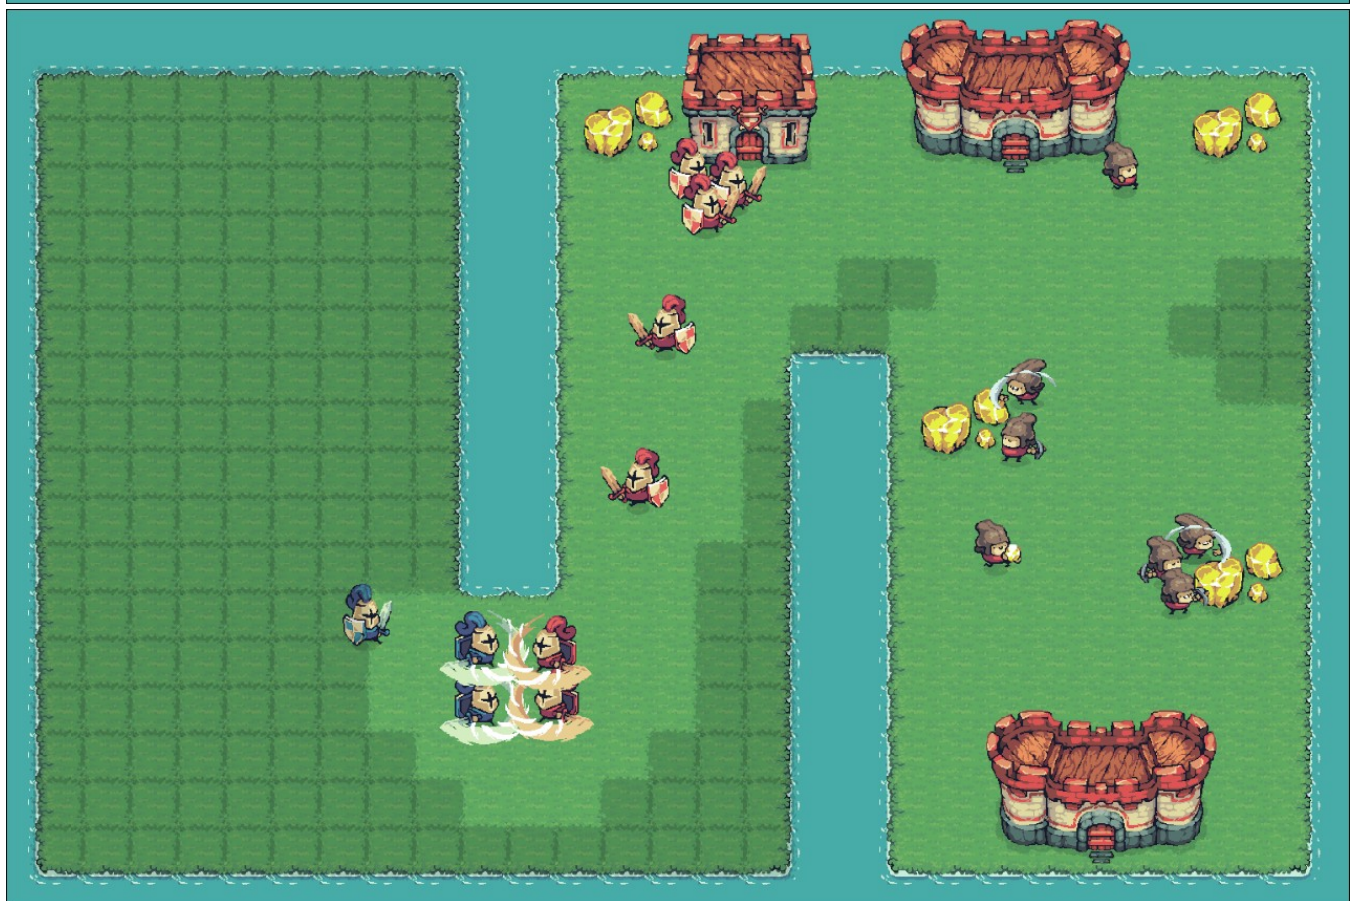

a barracks building that produces soldier units

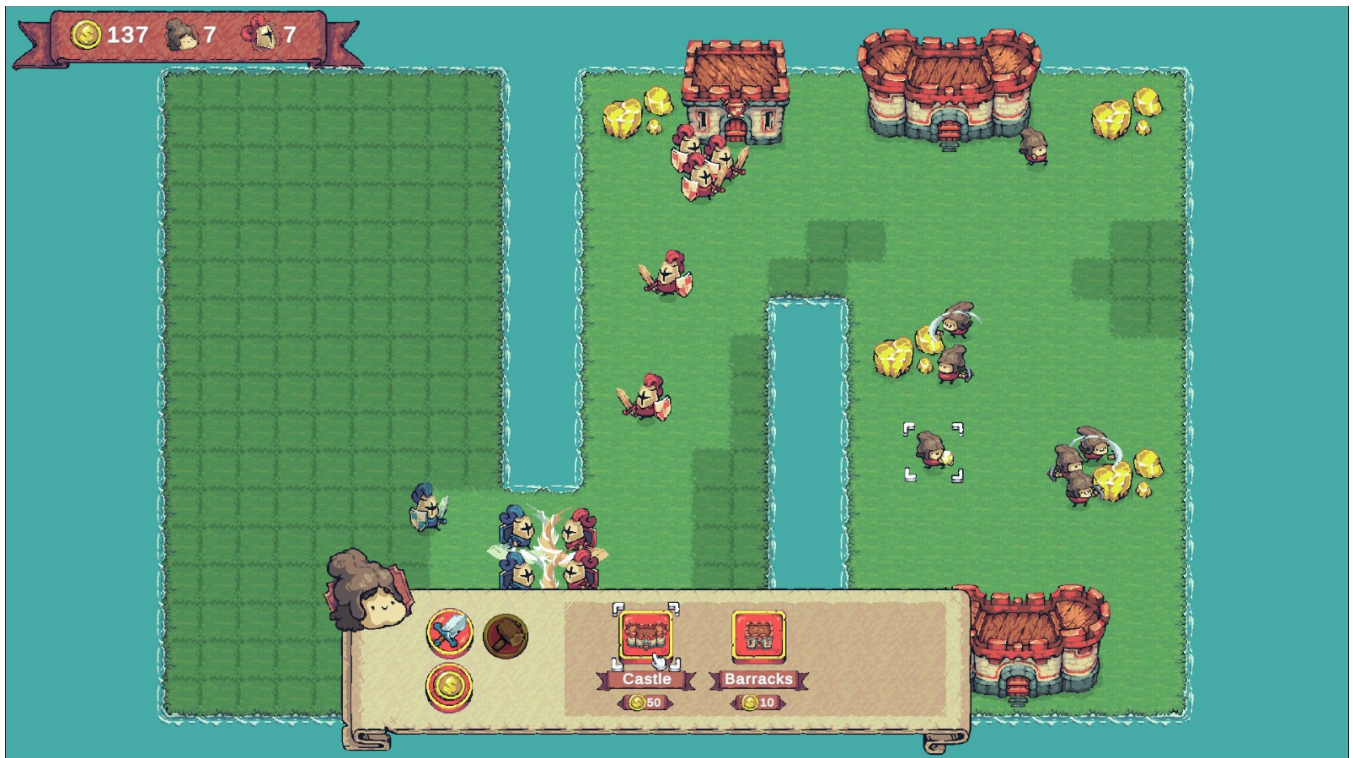

5 User Interface	The	will	whenever
	<i>money</i>	<i>increase</i>	<i>a worker unit gathers money</i>
	The	will	whenever
6 Other Features	<i>money</i>	<i>decrease</i>	<i>a building or unit is created</i>
	At the start of the game, the title	and the game will end when	
	<i>“Silly Wars”</i>	<i>will appear</i>	<i>a player has no structures left</i>
	<i>worker units will construct buildings as well.</i> <i>creating a unit and constructing a building takes time depending on what it is.</i> <i>There is also fog where units and buildings can’t see.</i>		

Project Timeline

Milestone	Description	Due
#1	- <i>Unit movement</i>	<i>05/18</i>
#2	- <i>Unit attacks</i>	<i>05/25</i>
#3	- <i>Structure building</i>	<i>05/29</i>
#4	- <i>Functional structures & Fog</i>	<i>05/31</i>
#5	- <i>Game AI</i>	<i>06/04</i>
Backlog	- <i>Harder AI / Neural Networks</i> - <i>More unit types</i> - <i>More intelligent pathfinding</i> - <i>Multiplayer</i>	<i>06/15</i>
